

Pipe Compression Test internal measurement accessories (ISO 9967)

For performing compression tests on pipe, Tinius Olsen can supply a variety of compression platens (25KN or 50Kn as standard). For accurate diameter measurement during compression test, Tinius Olsen offers three different models of 'internal pipe measurement device'. Each model can be used for a variety of different pipe diameters (see specs, below left for specific ranges)

Available Internal Pipe Measurement Devices;

S119	(6mm travel LVDT)			
Int. Pipe Ø	60mm	80mm	100mm	
	110mm	125mm		
S120	(25mm travel LVDT)			
Int. Pipe Ø	150mm	160mm	200mm	
	225mm	300mm	400mm	
	450mm	500mm	600mm	
	700mm			
S165	(50mm travel LVDT)			
Int. Pipe Ø	700 – 830mm			
	825 – 955mm			
	950 – 1080mm
